

Press Release

Triage Services appoints Steve Herman to head its barcode scanner and data capture operation

17 June 2008 — Triage Services, the UK's leading independent provider of repair solutions to the IT industry, today announced the promotion of Steve Herman to General Manager of its AIDC (automatic identification and data capture) division. Located in Wokingham, the division provides an extensive range of repair, refurbishment, and research and development services for AIDC technologies.

Steve Herman brings over 11 years industry experience to the role. In 1997 he joined the management team at Orderlogic – a scanner and auto ID specialist which was acquired by Triage Services in March 2003. In his previous role as Technical Director of the division, his incisive industry knowledge helped to propel Triage Services into its current market leading position in the sector.

Steve Herman, Triage Services

“AIDC has become an established data carrier and identifier discipline that’s applied in virtually every industry supply chain, and represents a key market for us,” comments Gary Moinet, Managing Director of Triage Services. “Steve is well regarded within the industry, and his comprehensive knowledge and technical expertise will enable us to continue to build momentum in this sector.”

ENDS

Notes for editors

Triage Services is the UK's leading independent provider of outsourcing and managed repair solutions to the IT service sector. It provides total service solutions for the repair and re-utilisation of ATMs, barcode scanners, networks, desktop products, notebooks and PDC equipment and offers both system integration and consultancy services. Triage Services is also a leading UK provider of support services for automatic identification and data capture (AIDC) technologies.
